Comment

Concern about how busy Upthorpe Road is particularly with the school next door -there can be 40+ cars blocking the road at pick up and drop off times as school layby not big enough to accomodate all the cars.

Suggestion of a pavement & a slip road from the main road to the entrance to help with access off a busy road

I feel that the new site for for the surgery will be beneficial to the village - it will provide off school parking - provision for future medial services, possible links with the school, improved health to the school children. I hope you are succesful with your bid for the funding.

We are very well served by the surgery at Stanton. The doctors and staff are very helpful and always give 100% care to all patients. The number of new houses being built in Stanton and the closure of Hopton Surgery makes it vital for the Stanton Surgery to have bigger premises in order to continue at their high level of service. We need to retain our wonderful doctors in a new larger building.

The new plan is excellent, it would be good to have blood tests taken in the surgery instead of having to go to Bury

We would like to see more disabled parking allowed for. An idea to have parking for buggies with possible re-charge points would be very welcome. Signs in large print would also be welcome. Will it be a eco-friendly site with solar panels etc.?

Concern about how busy Upthorpe Road is.

Like & support the idea but concerned about the maintenance of a flat roof. Also think the building looks like containers of top of each other but happy if it does the job.

Our doctors provide a very importantservice to our community and need the space to continue to do this in our growing village.We are fortunate to have uch wonderful doctors in our surgery and ther vision for the future means they will be able to continue to provide high quality healthcare for us. We would benefit from many of their anticipated improvements.

Sign is needed in the Stanton Surgery Car Park to say that patients can also park in the Health Centre Car Park

As Hopton has already a piece of land available for a new surgery it would benefit people at Garboldisham a great deal as many older people would find it difficult to travel to Stanton so it would make sense to take up the facility as offered

There has been insufficient consideration given to the proposal for a village funded new build surgery in Hopton

We keep hearing that there will be a prescription delivery service in Hopton but it never happens - will it happen any time soon?

Would you consider a prescription collection service in Garboldisham?

If we don't drive, how are we supposed to get to & from Hopton-Stanton & return. Public transport is practically non-existent

Number one priority is access to GP appointment within 48 hours (preferable). Everything else is nice but not essential

Impressive vision. We hope the public consultation will continue.

Plan looks good but it is missing a footpath from the road to the entrance door for pedestrians and wheelchair users.

It would be useful for another meeting to be set up after NHS funding & planning permission granted as there could be valuable comments given on the nitty gritty of the design of the interior space.

Prescriptions - not able to supply some of the drugs needed which means we have to collect from a pharmacy in Diss or Thetford. Appointments - we have to wait approx a week - not enough doctors (part-time) to cover patients

I think the present system is not working: 1. Difficulty in getting appointments in good time 2. Prescriptions not always complete which means another visit to surgery or a visit to another pharmacy 3. parking 4. Are there enough doctors to cope with the amount of patients on your books?

The service provided by the GPs is very good currently - maintaining quick appointment times & availability is my priority. More nursing led services & phlebotomy may be helpful. I would be happy with option E or F.

Any new surgery needs to cater for the growing population. A green field site in Stanton is a solution. My preference is for Option F, with facilities for X Ray, Minor operations & rooms for visiting consultants. I don't believe smaller GP surgery facilities in Hopton would be viable

Concerned about the distance from Garboldisham to Stanton and the cost - a large percentage of the village are pensioners who find it difficult

Why are there two disabled parking spaces at the rear of the new building plan - is it possible to move next to spaces allocated at the side of the main entrance? Is it possible to have a new addition of a footpath for pedestrians entering from the road? Otherwise excellent layout & provision of services.
